PROGRESS IN SURFACE SCIENCE

Volume 26, Numbers 1-4 1987

QUANTUM THEORY OF SURFACE PHENOMENA

In celebration of Professor Jaroslav Koutecký's 65th Birthday

Part II

CONTENTS

3. Surface Dynamical Processes

Electronic Friction in Metals and at Metal Surfaces 1
by K. SCHÖNHAMMER, L. BÖNIG and O. GUNNARSSON

Resonance Charge Transfer in Atom-Surface Scattering 19
by A. MODINOS

Electron Transfer Mechanisms in Surface Dynamical Processes 47
by M. TSUKADA, N. SHIMA and S. TSUNEYUKI

Adsorption Effects on Resonant Charge Transfer in Atom-Surface Scattering 63
by K.W. SULSTON, A.T. AMOS and S.G. DAVISON

Effects of Resonance Occupation on Dynamical Electronic Properties of Adsorbates 75
by B. GUMHALTER

Surface Reaction Dynamics and the Harmonic Oscillator 87
by J.W. GADZUK and S. HOLLOWAY

4. Interfaces

Interface Response Theory of Discrete Superlattices 103
by L. DOBRZYNSKI

Tight Binding Models for Non Ideal Semiconductor Interfaces 117
by M.C. MUNOZ, V.R. VELASCO and F. GARCIA-MOLINER

Ab-initio Self-Consistent Field Theory for the Treatment of Interface Between Two Different Quasi-One-Dimensional Chains 135
by JANOS LADIK

5. Clusters

Atomic and Electronic Structure of Microclusters 147
by S. SUGANO and C. SATOKO

Embedded Cluster Methods for Surface and Chemisorption Studies 165
by A.B. KUNZ

Structural Dependence of the Cohesive-Energy, Abundancy and Bond-Length of Transition-Metal Clusters 175
by G.M. PASTOR, J. DORANTES-DAVILA and K.H. BENNEMAN

The Use of Diatomic Energies to Analyze Adsorption and Coadsorption of CO and H on an Fe_{12} Cluster 181
by G. BLYHOLDER and M. LAWLESS

Electronic States of a Surface Nickel Atom on the Nickel (001) Surface 201
by P.V. MADHAVAN, F. v.TRENTINI and J.L. WHITTEN

A CNDO Calculation of Electron and Hole Defects in a Mixed Halide Alkaline Earth Crystal 213
by R.C. BAETZOLD
